PROFILE

Full stack MERN developer with a focus on clean, optimized code. Experienced in solo and team projects, bringing strong problem-solving skills and attention to detail. Currently developing fintech solutions with a passion for scalable, high-performance web applications.

WORK EXPERIENCE

Hyperface Technologies   JAN 2024 - PRESENT
Application Engineer

- Developed and implemented new features for two major products using **React**, **React Native**, **Node.js**, and **MySQL**, ensuring smooth integration into production.
- Created a **Kotlin library** demo to enable seamless integration of the company's **PWA** with banking clients' **Android** apps, supporting client acquisition efforts.
- Managed and maintained the company's **WordPress** website, delivering new features and updates to enhance functionality and user experience.
- Contributed to multiple repositories, developing and improving features across the stack, leveraging **Git** for version control and collaboration.

ACHIEVEMENTS

Hackathon Winner - Bring AI to Hyperface

Built an AI platform in 24 hours to cluster users based on location, transaction history, card limit and other variables. It filtered personalized offers for users, enabled banks to simulate offer effectiveness, optimizing marketing strategies.

PROJECTS

Wood Fans Live Demo link   GitHub Repo Link

- Developed a full MERN project for an online furniture buying platform
